Kidney Health Australia's Primary Care Education Program in partnership with {insert organisation} is pleased to present an interactive case study based workshop

'Connecting CKD: the link with Diabetes'

Date	***Date here***
Time	*Time here*
Venue	*Venue*
Presented by	*name*

Learning outcomes

- State the major risk factors for developing chronic kidney disease (CKD)
- Determine the stage of chronic kidney disease (CKD) through accurate interpretation of kidney function test results
- Outline the adverse outcomes of a combined Diabetes and CKD diagnosis (DKD)
- Explore the nurse's role in early detection, reducing the modifiable risk factors and management of DKD
- Develop a system to screen at risk patients that includes CKD testing and management

Activity accreditation

- *This workshop is developed and endorsed by the Primary Care Education Advisory Committee for KHA*
- *This activity has been endorsed by APNA according to approved quality standards criteria. Completion of the educational activity entitles eligible participants to claim CPD hours*

APNA CPD ENDORSED 2016
