

Diabetes Wounds and Foot Care Workshop
1.30-3.30pm, Friday 2 June 2017
Novotel Northbeach Wollongong

The workshop aims to increase target audience knowledge and identification of diabetic feet including wounds, lesions and/or lack of sensation and appropriate referral to other healthcare professionals and specialists.

The workshop will be facilitated by a Podiatrist and Wound Care Specialist with presentations for approximately 10-15 minutes each followed by hands-on demonstrations and practice of wound identification, risk rating and dressings.

This workshop is capped at 30 participants.
