

NURSES MAKE THE DIFFERENCE

It is more important than ever to help your patients live well with diabetes.

During lockdown, routine pathology testing dropped by **~40%**¹

This means **>60,000** Australians did not receive the tests they needed every day¹

Your healthcare team, including Credentialed Diabetes Educators can support you and your patients living with diabetes to maintain their regular HbA_{1c} tests

COMING SOON: Look out for the new NDSS National Diabetes Nursing Education Framework – the gold standard for improving health outcomes for people living with diabetes²
