

Managing diabetes in people with competing priorities

THURSDAY, 14th JULY 2022
LIVE, FROM 7.00pm - 8.00pm (AEST)

Please join us for this thought-provoking live panel discussion as we discuss the management of a person with diabetes and significant mental health issues.

Using a case study, the panel will discuss what support services are available, the role of a multidisciplinary team, the impact that small changes to diet and exercise can have to a person's mental and physical health.

We value the questions we receive for our live events, it enriches the experience for not only our viewers but also our presenters. To allocate enough time for Q&A it's helpful to receive questions in advance.
