

## **Medical Information Response**

### *Dosing by Number of Clicks on OZEMPIC® (semaglutide) injection Pen*

Novo Nordisk has not evaluated dosing of OZEMPIC® by number of clicks using the OZEMPIC® pen; therefore, dosing of OZEMPIC® based on number of clicks is not recommended, as the dose administered cannot be guaranteed.<sup>1</sup>

Novo Nordisk recommends that only marked doses of 0.25 mg or 0.5 mg be selected for the OZEMPIC® 0.25mg/0.5 mg pen and marked dose of 1 mg be selected for the OZEMPIC® 1 mg pen.<sup>1</sup> Using unmarked doses could result in product waste as well as inaccurate or inconsistent dosing. Additionally, because Novo Nordisk does not recommend dosing by number of clicks, we cannot provide the exact dosage and volume of OZEMPIC® provided with each audible click of the pen.

For additional details regarding dosage forms and strengths of the OZEMPIC® pens, please see [Table 1](#) below.

**Table 1. Dosage Forms and Strengths<sup>1</sup>**

<b>Injection</b>	<b>2 mg/1.5 mL</b>	<b>4 mg/3 mL</b>
<b>Concentration</b>	1.34 mg/mL	1.34 mg/mL
<b>Dose delivered per injection</b>	0.25 mg or 0.5 mg	1 mg
